PROCEDURES FOR ADMINISTERING MEDICINE IN SCHOOL

We can only administer medicine, cream and inhalers in school to your child if

- It has a prescription label, with the child's name, the date prescribed and dosage needed
- You have completed an administering medicine form

Medicine must be handed into the office, by an adult, where you can complete a medicine form.

Inhalers will be kept in a green basket in each classroom, not with the child

If you would like your child to have any unprescribed medicine/cream, you can come into school to administer this yourself.
